United States of America

DRAFT PROPOSAL FOR THE WORK OF THE CONFERENCE

WRC-03 Agenda Item 7.2(e): to recommend to the Council items for inclusion in the agenda for the next WRC, and to give its views on the preliminary agenda for the subsequent conference and on possible agenda items for future conferences, taking into account Resolution 801 (WRC-2000),

Background Information: Agenda item 3.1 reads: to consider results of ITU-R studies on the feasibility of sharing in the band 2 700-2 900 MHz between the aeronautical radionavigation service, meteorological radars and the mobile service, and to take appropriate action on this subject;

The agenda item should be suppressed. Studies conducted in response to agenda item 3.1 indicate that sharing is not possible and therefore no further action is necessary or appropriate.

Proposal:

RESOLUTION 801 (WRC-20003)

Preliminary Aagenda for the 2005/2006 World Radiocommunication Conference

The World Radiocommunication Conference (Istanbul, 2000), (Geneva, 2003),

Reasons: Editorial

resolves to give the view

USA/ / 2 SUP

3.1 to consider results of ITU R studies on the feasibility of sharing in the band 2 700 2 900 MHz between the aeronautical radionavigation service, meteorological radars and the mobile service, and to take appropriate action on this subject.

Reasons: ITU-R Working Party 8B has considered several studies on the feasibility of sharing between IMT-2000 and radar systems operated in the band 2 700-2 900 MHz. Those studies indicate that sharing the band 2 700-2 900 MHz between the mobile service (IMT-2000) and aeronautical radionavigation service and meteorological radars is not feasible.
